Technical advisers on environmental issues

Environmental Policy Statement

MJCA believe that we have a responsibility to care for and protect the environment in which we operate. We are fully committed to improving environmental performance across our business wherever practicable. MJCA consider that our greatest potential for impacts on the environment is through the environmental advice that we give our clients.

The quality of the environmental protection advice that we give to our clients is controlled through our Quality Management System which is certified to ISO 9001: 2015.

MJCA is committed to responsible environmental performance in all of its activities and has set out the following objectives to manage and reduce the impact of its operations on the environment:

- to comply with all applicable environmental legislation that relates to the activities of MJCA
- to work with clients and suppliers to improve and optimise our environmental practices
- to manage our business operations with the objective of preventing pollution of the environment
- to manage waste generated from our business operations according to the principles of the waste hierarchy and the Waste Framework Directive
- to improve the efficiency of the use of energy and resources and reduce their use wherever possible

The policy will be implemented by setting appropriate objectives and targets and will be reviewed on a regular basis.
